MARKETING FOR OPEN-SOURCE PROJECTS

MARKETING + DEVELOPERS

It's not uncommon to hear that developers don't like marketing.

Ignore that. They just don't like certain baggage that usually comes with it:

- gimmicks
- irrelevant messaging
- things that don't actually address their problems/needs
- The fact is that even great code cannot succeed alone
- The growth of open-source software makes this very apparent:
- 80+ million GitHub repos
- MANY duplicates = lack of communication (marketing)

NOTES:

MARKETING FOR OPEN-SOURCE PROJECTS

OPEN SOURCE

OR

OPEN-SOURCE

Hyphenate open-source as an adjective preceding a noun, as in **open-source software**. Don't use open-sourced as an adjective.

Don't hyphenate in other instances, such as **Open source is a development model in which**

NOTES:

MARKETING FOR OPEN-SOURCE PROJECTS

THE KEY

- **Promote first**
- **Remain authentic and true** to the open-source ethos of openness and transparency

NOTES:

MARKETING FOR OPEN-SOURCE PROJECTS

GOALS:
KNOW THE END TO
FIND THE MEANS

The main goals of marketing for your open-source software:

- Attract contributors
- Acquire users
- Raise the profile and credibility of your project

NOTES:

MARKETING FOR OPEN-SOURCE PROJECTS

BUT IT'S FREE,

SO I DON'T HAVE TO
TRY AND SELL IT,

RIGHT?

WRONG!!!

- You ARE selling, just not products, but ideas
- It is NOT free, in return you get people's time and attention

NOTES:

Commercial

Open-Source

CO-MARKETING

NOTES:

[illegible]

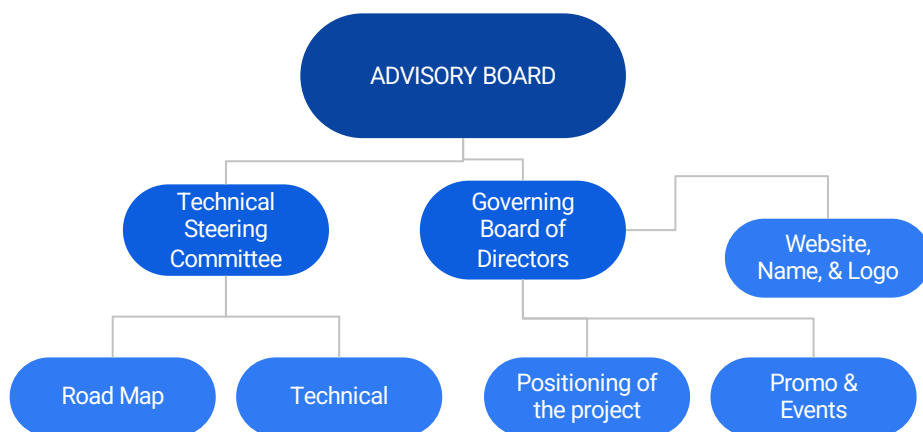

CO-MARKETING

- **Internal** - asking large companies that already use your software
 - Totally accepted
 - Usually through existing relationships between you and the company
- **External** - Umbrella organization and open-source foundations
 - <https://opensource.com/resources/organizations>

NOTES:

[illegible]

CO-MARKETING

NOTES:

[illegible]

CO-MARKETING

[illegible]

COMMERCIAL

GOAL: acquire **customers** who then buy the product and thus grow the company's revenue

TACTICS: Slick ads, videos, and other materials

OPEN-SOURCE

GOAL: acquire **users (contributors)** to make software more useful for more communities and continue to contribute for software to advance.

TACTICS: Authenticity, transparency, and a real solution to a real problem

CREATE A MARKETING STRATEGY

NEEDS are the building blocks of creating a marketing strategy plan for an open-source project.

Grow my user base

Grow a contributor base

Raise money for this project

NOTES:

“The marketing strategy dovetails a bit on the structure of the project. If the marketing strategy dovetails directly into what the project is trying to accomplish, then things should work pretty seamlessly,” **-Dawn Foster , OSS Strategy Lead at Pivotal Software.**

[illegible]

Budget Management

- Budget mostly from M + C Companies
- Stretch It Out!!!
 - Community pitching in
 - Volunteers
 - Using websites and social media to boost outreach
 - Leverage entire community
- Document

[illegible]

NOTES:

Branding

By nature it sells your project as:

- Transparent
- Authentic
- Community-related
- Innovative
- Fast paced
- User involvement options
 - See code
 - Contribute
 - Change
 - Modify

NOTE: You must uphold the openness, authenticity, and integrity of the brand

NOTES:

[illegible]

MARKETING FOR OPEN-SOURCE PROJECTS

GETTING THE WORD OUT

- Raise the profile of your organization
- Build a solid reputation
- Use word-of-mouth
 - Answer Qs in mailing lists, wikis, forums, events
- Make it easy for new devs to get up to speed and start contributing
 - Use a Code of Conduct (see next slide)

NOTES:

NOTES:

[illegible]

MARKETING FOR OPEN-SOURCE PROJECTS

GETTING THE WORD OUT

- Host hackathons
- Social Meetups
- Community Events
- Audio Spaces
- MeetUp Groups
- Pay Attention & Reward Loyal Contributors
 - T-Shirts
 - Invites to events
 - Public recognition
- Ambassador Programs

NOTES:

[illegible]

Methods and Proven Practices:

- Attending, sponsoring, presenting, or hosting events
 - Gathers developers and users in one place
- Social media
 - Online events
 - More communication
 - Multi-purpose posts → CONTENT

Methods and Proven Practices:

- Blog posts, tutorials, demos, whitepapers, and videos
 - Share info on project
 - Serve as instructions on contributing
 - Keep current
- Direct marketing
 - Emails & online advertising
 - Catch those who slipped through the cracks
- SEO
